

RAW MATERIALS / SDS FOR K-FLEX USA PRODUCTS

K-Flex USA insulation products are safe and easy to use. No protective clothing, special handling or installation equipment is needed. Safety Data Sheets (SDS) are available for all products on our website, www.kflexusa.com.

K-Flex USA's elastomeric and polyethylene-based insulation products are fiber-free, non-dusting, and require no special breathing apparatus or personal protection during installation. They are easy to handle. Fabrication is easy because these products are easy to cut and are non-abrasive.

They contain no latex- or formaldehyde-based raw materials. Problems associated with allergic reactions and skin sensitivity associated with latex-based materials are not an issue.

K-Flex USA products contain no brominated flame retardants.

K-Flex USA products are friendly to the environment. Ozone-depleting materials, like CFCs and HCFCs, are not used in the production of K-Flex USA products. The use of ozone-depleting chemicals is regulated by the government and is not allowed. ODP = 0 for K-Flex USA products.

K-Flex USA insulation products are designed with the user in mind. Manufacturing safe and easy to use products with the highest performance is our goal.
